# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference C1-A0509P	FOR FURTHER ACTION	See item 4 below				
International application No. PCT/JP2006/311625	International filing date (day/month/year) 09 June 2006 (09.06.2006)	Priority date (day/month/year) 10 June 2005 (10.06.2005)				
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237						
Applicant CHUGAI SEIYAKU KABUSHIKI KAISHA						

<ol> <li>This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis. 1(a).</li> <li>This REPORT consists of a total of 4 sheets, including this cover sheet.         In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reto the international preliminary report on patentability (Chapter I) instead.     </li> </ol>	ference					
In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a re	ference					
	ference					
3. This report contains indications relating to the following items:						
Box No. I Basis of the report						
Box No. II Priority						
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
Box No. IV Lack of unity of invention						
Box No. V  Reasoned statement under Article 35(2) with regard to novelty, inventive step or industry applicability; citations and explanations supporting such statement	trial					
Box No. VI Certain documents cited						
Box No. VII Certain defects in the international application						
Box No. VIII Certain observations on the international application						
4. The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 be not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the prior date (Rule 44bis.2).						
Date of issuance of this report 11 December 2007 (11.12.2007)						
The International Bureau of WIPO  Authorized officer						
34, chemin des Colombettes 1211 Geneva 20, Switzerland  Yoshiko Kuwahara

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

COPYPSUBMITTED IN IDS

	Box	No. I	Basis of this opinion	
ſ	1.	With	h regard to the language, this opinion has been established on the basis of:	
		$\boxtimes$	the international application in the language in which it was filed	
l		$\Box$	the translation of the international application into, which is the language	e of a
		***************************************	translation furnished for the purposes of international search (Rule 12.3(a) and 23.1(b)).	50 OI U
	2.		h regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the intion, this opinion has been established on the basis of:	claimed
ĺ		a.	type of material	
			a sequence listing	
l			table(s) related to the sequence listing	
		b.	format of material	
			on paper	
			in electronic form	
		c.	time of filing/furnishing	
		[	contained in the international application as filed	
		[	filed together with the international application in electronic form	
		[	furnished subsequently to this Authority for the purposes of search	
1	3.	_	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been furnished, the required statements that the information in the subsequent or additional copies is identical to that in the applic filed or does not go beyond the application as filed, as appropriate, were furnished.

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/JP2006/311625

		Reasoned statemen1 under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and expianations supporting such statemen1			
1.	Statement				
	Novelty (1	1)	Claims	3-4, 11-12, 18-21	YES
			Claims	1-2, 5-10, 13-17	NO
	Inventive	step (IS)	Claims		YES
			Claims	1-21	NO
	Industrial a	applicability (IA)	Claims	1-21	YES
			Claims		NO

#### 2. Citations and explanations:

The following documents are presented in the ISR:

Document 1: JP, 3-41033, A (KYOWA HAKKO KOGYO CO., LTD.)

Document 2: JP, 2004-292455, A (Chugai Pharmaceutical Co., Ltd.)

Document 3: WO, 2004-037293, A (Dainippon Sumitomo Pharma Co., Ltd.)

### Regarding Claims 1-2, 5-10, and 13-14:

Document 1 discloses the technical feature of adding a sugar in order to stabilize motilin or the like that is, for example, a protein. Document 1 illustrates meglumine as an example of the added sugar. Document 1 also discloses the technical feature of obtaining a lyophilized preparation by performing a lyophilizing step, after performing the step of adding the stabilizer such as meglumine to motilin or the like that is, for example, a protein.

Consequently, the subject matters of claims 1-2, 5-10, and 13-14 in the present international application do not appear to be novel or to involve an inventive step over document 1.

### Regarding claims 3-4, 11-12, and 18-21:

The subject matters of claims 3-4, 11-12, and 18-21 in the present international application are different from the disclosure in document 1 in that the protein is an antibody molecule.

However, document 2 discloses that, when a protein is stored in a solution having a high concentration, a problem may arise where a degrading phenomenon such as generation of an insoluble aggregate occurs, and that it is necessary to prevent the problem from occurring. In particular, in view of the problem where an aggregate is easily generated when an antibody preparation is stored in a solution state, and thus an insoluble aggregate may be generated, document 2 also discloses the technical feature of adding a stabilizer made of a sugar to the antibody.

Consequently, it would have been obvious to a person skilled in the art to use an antibody instead of motilin or the like as the protein in the disclosure of document 1 so as to test and confirm the stabilizing effect of meglumine.

As a result, the subject matters of claims 3-4, 11-12, and 18-21 in the present international application appear to be novel but do not appear to involve an inventive step over documents 1 and 2.

#### Regarding claims 15-17:

Document 3 discloses a pharmaceutical composition into which meglumine has been added as a stabilizer. Document 3 also discloses that the preparation may be in the form of a lyophilized preparation.

Accordingly, the subject matters of claims 15-17 in the present international application do not appear to be novel or to involve an inventive step over document 3.
